

Collation Packs 20 KG

Inserts in a self-locking telescope box with a calculated filling capacity of approx. 20 kg of highly viscous substance

Configuration

Article Ref.	Dimensions Inside	Number of silicon paper inserts & volume per packing	Silicon papaer	Quantity each palett
S20/09-3	175 X 120 X 130 mm	9 inserts for 2,0 KG	Type 3	48 cardboards
S20/06-2	180 X 175 X 130 mm	6 inserts for 3,0 KG	Type 2	48 cardboards
S20/06-3	180 X 175 X 130 mm	6 inserts for 3,0 KG	Type 3	48 cardboards
S20/04-2	273 X 175 X 130 mm	4 inserts for 5,0 KG	Type 2	48 cardboards
S20/04-3	273 X 175 X 130 mm	4 inserts for 5,0 KG	Type 3	48 cardboards

Quality: closed B-flute VDW* 1.3 standard corrugated board
Materials: 170 g/m² kraftliner + 120 g/m² corrugated material + 140 g/m² test liner
Type : bottom part to FEFCO 0423, lid to FEFCO 0422
Inside dimensions: 555 x 365 x 142mm
Separator: Pasteboard 750 g/m²
Other featuress: bottom part and lid lined with second quality silicon paper
 * VDW = Association of German Corrugated Board Manufacturers

Silicon paper:
 Type 2 = silicon paper 120g/m², "solvent-freei" 3,2g/m²,
 Type 3 = silicon paper 135g/m², "solvent-freei" 2,3g/m²,

Release value 6cN/40mm +/- 3cN
 Release value 7cN/40mm +/- 4cN
